2022 second quarter air quality monitoring results released

Fort Air Partnership (FAP), the organization that monitors the air local residents breathe, released 2022 second quarter Air Quality Health Index (AQHI) results today.

The Government of Alberta calculates the AQHI using data collected at seven of FAP's air monitoring stations.

Results show that AQHI in the Airshed was of low risk to health at least 98% of the time for April, May, and June.

There were zero hours of high or very high AQHI rating for the calendar quarter. Risk to health increases as the index level rises. In comparing the 2022 second-quarter results

to the 2021 second-quarter results, there were fewer moderate risk level hours in 2022 than in 2021 (102 in 2022 compared to 153 in 2021). There was only one hour of high AQHI rating for the second quarter in 2021 compared to zero in 2022.

The forecasted and daily Alberta Health Quality Index for the Fort Air

Partnership Airshed can be found at fortair.org.

The website also has a live data feed for a variety of substances that FAP measures, as well as weekly, quarterly and annual AQHI results.

Morinville community library

By Myrina Carter

The Morinville Community Library is located at 10125-100 Avenue and is an essential staple in town. They focus on bringing everyone together, whether with early literacy, diverse clubs for all ages, or enjoying a good book.

Throughout the year, the library hosts many free programs starting with the 1000 books program, which encourages parents to begin reading to their children in the early years before pre-k. It is to help the child get ready for school and the learning process.

The library offers a log for parents to fill out as they read, every milestone that is hit (100, 200, etc.), your photo is taken and put up on display in the kid's area, and you can receive a sponsored graduation and reward.

Cozy Corner Stories and Crafts is offered to younger children at the library every Thursday morning. Stories are read and include a take-home craft bag following the theme of the story.

Isabelle Cramp, Library Director, said, "Our programs help prepare kids with early literacy, having the experience of sitting down reading and rhyming and participating in a school-like setting."

Offered to the older children are summer and winter reading programs which kids are then split into teams where they can compete and accumulate their reading minutes and earn rewards.

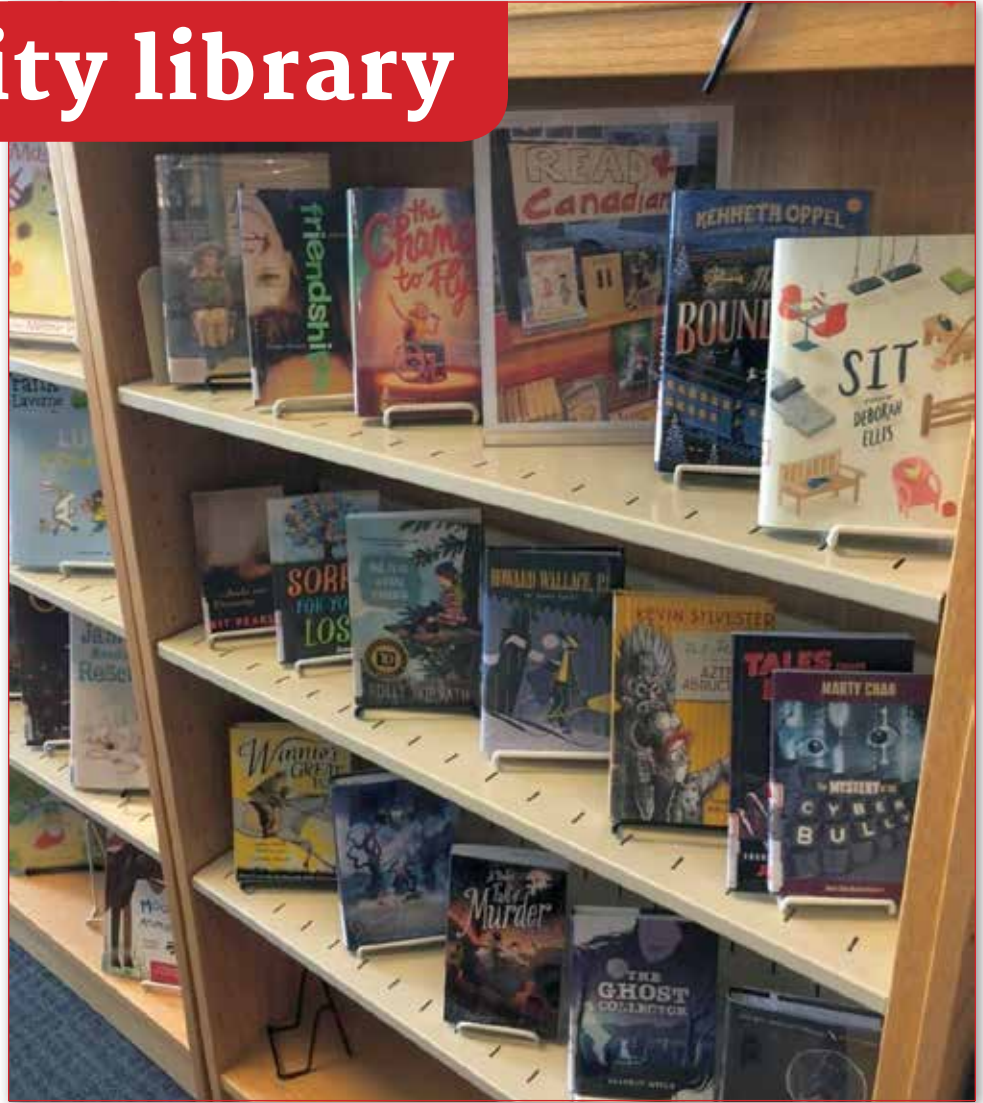

Animanga and Minecraft clubs are fully supervised by staff and allow teens and young adults to chat in groups with people with the same interests in games or their favourite anime shows.

The library has adult clubs, including quilting, spinning/knitting, and a book club.

Adults of all ages can look forward to trying something new with the discovery and creativity bags, which bring awareness and find new skills. Or ask the staff to try "spice it up," which includes all sorts of unique spices and tea.

Something for your family to look forward to this Christmas is the second annual 24 days to Christmas "big bag." This includes a countdown calendar, activities for all to enjoy, new recipes to try, and a QR code that will bring you to a new book the family can sit down and enjoy together.

Cramp stated, "the library is more than just books. You can expect literacy services, public computers with the internet, printing, and photocopying. A library is a place where everyone is welcome and is a safe place for anyone! A place we want to encourage people to come to discover if they haven't been here. People will be amazed by how many resources we have available here. We are very passionate about the community and responsive to hearing feedback. We like to hear what the people need to grow our services to serve the community better."

Bylaw 1597/22 Diversified Agriculture & Events

Council to Consider Potential Second Reading of Bylaw 1597/22 (Diversified Agriculture and Events) in September 2022

On June 14, 2022, Sturgeon County Council held a Public Hearing regarding Bylaw 1597/22. This bylaw encompassed the Agribusiness and Agritourism Review Task Force recommendations and proposed the following amendments to the County's Land Use Bylaw:

- Include Diversified Agriculture within the AG-Agriculture District as a permitted use, and also create a new AG2 – Agriculture 2 District that supports more intensive permitted uses. Diversified Agriculture includes value added ag processing, retail sales of ag products, and allows for commercial experiences and events related to farming or farm life. If approved, operators could seek permits for these uses without the need for neighbour advisement and potential appeal.
- The proposed bylaw also allows for event venues to be located within AG parcels, as a discretionary use. This means that operators could apply to have an event venue, and the permit/conditions would be subject to potential appeal by affected parties.

You can access Bylaw 1597/22 at sturgeoncounty.ca/AgriReview.

The County received significant feedback during the Public Hearing, and we want to ensure Council has sufficient time to review and consider that input fully. Therefore, **Council will next be considering the bylaw at the September 13, 2022, Council Meeting.**

Given the extent and nature of the feedback received, there is the potential for further amendments to the proposed bylaw when Council considers second reading. Should there be substantive amendments to the bylaw, Sturgeon County would hold an additional public hearing to allow the public to comment on any proposed changes prior to further consideration.

The agenda for the September 13, 2022, Council Meeting will be published closer to the meeting date, and all materials will be publicly available at sturgeoncounty.ca/CouncilMeetings.

Gibbons Royal Canadian Legion celebrated its 75-year anniversary

A buffet-style catered dinner was offered to all who purchased tickets.

Guests shared a delicious meal and enjoyed a live show from Voices of Legends, and listened to the sounds of the piper that had put on quite the performance.

Attendees were fascinated by the presentations held by Phelan and the

historical display set up; many items dated back to 1947.

Longstaff said, "75 years of helping the veterans and their families, we wouldn't have been able to do it without the support and help from our fantastic community! It is nice to enjoy laughs, stories, and great food with our town's amazing people."

Level: Intermediate

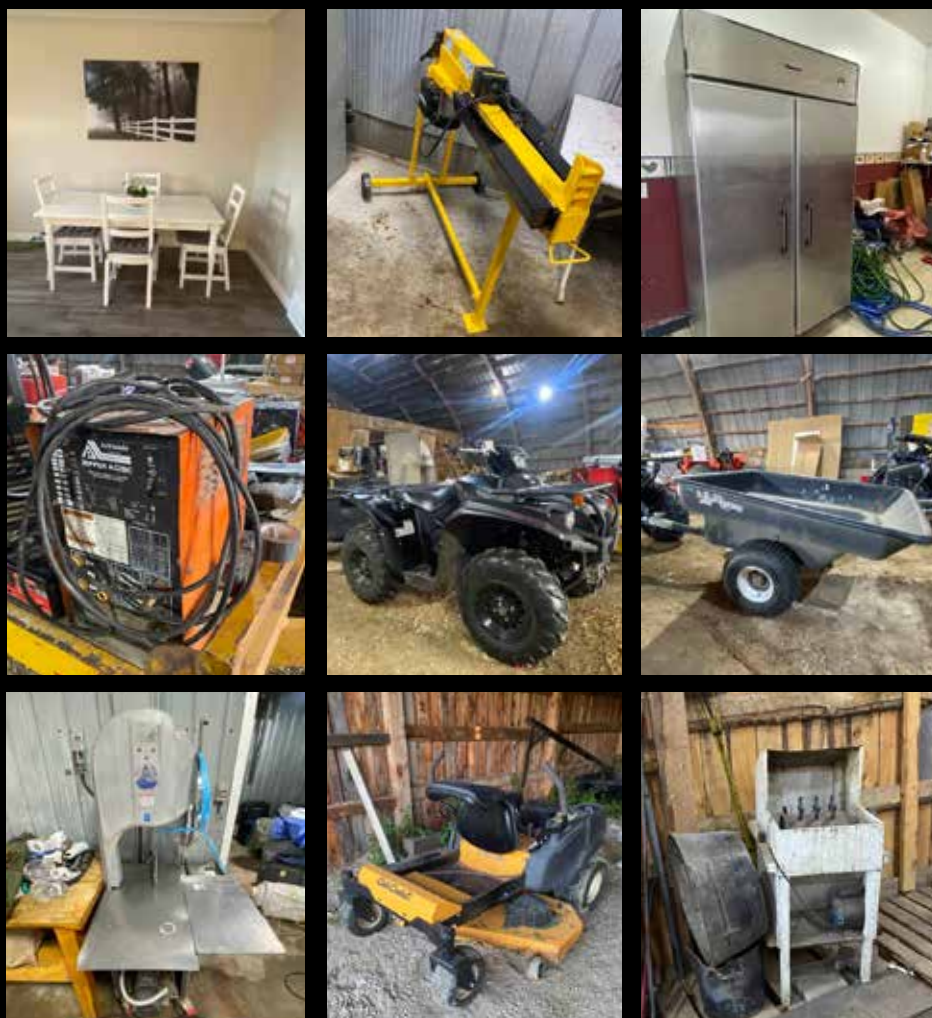

Here's How It Works: Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!

NWR Sturgeon Refinery's first major turnaround began August 8

A lot can happen in 55 days. For NWR Sturgeon Refinery, "a lot" translates into over 600,000 hours of planned work as our first major turnaround started August 8.

This means production in all 10 units at the refinery will be at a stand still. Over 2,000 workers in over 30 different skilled trades will work around the clock on the planned preventative maintenance, renovations, inspections and upgrades over the next 55 days.

A turnaround is a necessary part of life at a refinery – it not only ensures safe, reliable operations, it also ensures we continue to meet government regulations.

Jeff Trevors, NWR's Turnaround Superintendent explains:

"We're committed to delivering our first full turnaround focused on safety, quality and schedule compliance. We employ a Goal Zero approach and plan to balance the risks of the turnaround by taking care of our team, environment and neighbours.

"We know these factors are equally important as the products we produce. To that end, we have focused on creating a high-performance safety culture with our internal and external contractors, all of whom strive to conduct their job tasks safely," explains Jeff.

"We're creating a safer work

environment with the help of effective leading indicators and key safety metrics. This can help pinpoint trends and patterns, helping our management team make data-driven decisions to protect the workforce and restart the refinery without incident.

What you can expect to see on-site during turnaround

If you're driving by the refinery, you can expect to see more traffic and equipment like cranes around the site. We'll be updating our social media feeds and nwrsturgeon-refinery.com regularly throughout

turnaround to keep the community up-to-date on where we're at in our turnaround process.

The NWR Sturgeon Refinery is the world's only refinery designed from the ground up to

minimize its environmental footprint through carbon capture and storage while producing the high-value, low-carbon products needed to meet North America's demand for energy. More information about the refinery can be found on our website.
